I am interested in ADDITIONAL INFORMATION on:
The Opportunities FOR NURSES IN PATIENT SAFETY

97% Agreed and 88% Strongly or Very Strongly Agreed, and 69% Very Strongly Agreed

Source: TMIT High Performer Webinar Series; Dauntless Leaders in Nursing: Impacting Patient Safety – October 18, 2018
Specific NURSING Issues
I would like covered include:

- Allowing time for front line staff to redesign their work.
- Bridging the divide created through union vs. Management posturing
- Bullying
- Can we have something on pharmacist in patient safety
- Civility
- Communication skills
- Correlating outcomes with compliance measures (cauti, sepsis, etc.); What difference does it make, what we do?
- Covering yourself adequately in charting with the time constraints of a 12 hour shift or charting by exception vs charting everything.
- Creating infrastructure and teams to effect change in the hospital environment after safety/quality concerns have been identified.
- Crucial conversations
- Dealing with staff that like to intimidate others.
- Difficult conversation best practices to develop skill/technique
- Do you feel like you received adequate training as a new nurse
- Empowering nurses as team members
- Empowering nurses to change the culture of safety
- Facilitating hospital culture change with a dictator administration, foster a culture of safety
- Falls and falls with harm
- Falls, femoral site bleeding, avoiding medication mistakes
- Giving appropriate discharge instructions, how to adapt to patient understanding.
- Healthcare violence against nurses how long the shifts are?
- How nurses relationship with physicians affect patient care
- How to be safe all the time and keeping it in the forefront.
- How to get bedside nurse’s mindset to be pt. Safety
- How to level the hierarchy in nursing
- How to respond when associates cite staffing issues as the reason they don’t follow safety steps
- How to speak up to physicians
- How to treat a nurse coming to your department to cover with nurse call out/shortage in the department
- Infection prevention and safety
- Just culture
- Just culture - balancing individual mistakes with process failures, how to hold somebody accountable for their actions without punishing them? (Without verbal's and written?)
- Lateral violence
- Leadership accountability
- Legal issues with charting adverse events
- Medication errors; dilution issues; IV administration errors; communicating outside of nursing
- More specifics on how to have those difficult conversations in the moment; ways to measure communication competence
- Multidisciplinary high risk patient safety rounds
- Patient safety in the ED and bullying
- Regulation vs time for care of the patient
- Second victims
- Strategies for improving culture of safety
- Strategies for nurses to speak up
- Why nurses eat the younger RN’s
- Workplace violence prevention
- Would be nice to have an ambulatory view on safety
